Table Sponsor Deadline | AUGUST 09, 2024

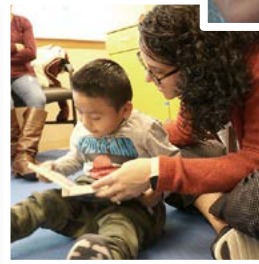

CHILDREN'S HEALTH CARE SERVICES

OUR MISSION

Siskin Children's Institute works to improve the quality of life for children with special needs and their families.

OUR VISION

Siskin Children's Institute will be a nationally recognized leader of evidence based services for children with diverse abilities using a family centered approach to increase access and opportunity for each child to reach his or her life goals.

Founded in 1950 by Mose and Garrison Siskin in Chattanooga, Tennessee, Siskin Children's Institute achieves its mission through pediatric health care services, home and community-based programs, and outreach services in the field of developmental disabilities.

Developmental-behavioral Medicine

The Siskin Center for Developmental Pediatrics is a regional developmental pediatric center, led by a team of developmental pediatricians, with services available in Chattanooga and Nashville, TN. Children are referred to the Institute for medical, psychological and cognitive assessment, diagnosis and treatment, including occupational, speech and language, feeding, and applied behavior analysis therapy services.

Early Intervention Care

The Siskin Home & Community-Based Early Intervention program is designed to help parents, other caregivers and children with special needs gain the knowledge and confidence they need to be successful in life. Through visits with an early intervention coach, the family receives information, support, guidance and consultation about improving the child's and family's quality of life. It's a program that can be provided in the home, child care center, the park or other natural settings in the community.

Outreach

Siskin Outreach Services provide disability information to families, college students and professionals through a dynamic array of programs that weave through the Institute's other areas of focus. Outreach Services houses the Helen Siskin Pregulman Family Voices of Tennessee Southeast Partnership program, offering a lending library, family support and training, consultation services, and professional training in fields related to special needs, and early childhood development.
